60+
COUNTRIES
WORLDWIDE

A broad range of services for growth-oriented SMEs

INTERNATIONAL PARTNERSHIPS

Partnership database

Brokerage events

Company missions

ADVISORY SUPPORT

Advice on EU laws and standards

Market intelligence

IPR expertise

INNOVATION SUPPORT

Access to finance and funding

Innovation Management Services

Technology transfer

How it works: international partnerships

The Network's business database contains thousands of company profiles to find the perfect match. In addition we organise:

Matchmaking events across Europe where SMEs can meet potential business partners in person.

Company missions where we set up and prepare you for targeted international meetings with strong business prospects

14/10/2020

This is the fourth piece in a series about the "Sustainability of (Open) Data Portal

Open Data Maturity in Europe

The open data maturity study serves as a benchmark to gain insights into the development achieved in the field of open data in Europe. It assesses the level of maturity against four dimensions: policy, portal, impact, and quality. The study clusters countries into four different groups:

The screenshot shows the European Data Portal interface. At the top, there is a logo for 'EUROPEAN DATA PORTAL', a language dropdown set to 'English (en)', and a search bar containing 'Search Site content ...'. Below this is a navigation bar with categories: 'Data', 'Impact & Studies', 'Training', 'News & Events', and 'About'. A secondary bar contains filters: 'EU and international data', 'Country data', 'SPARQL Search', 'Statistics', and 'Metadata Quality'. The main content area features a search filter 'Filter by location', an order dropdown 'Order by: Last Modified', and a 'Datasets Feed' button. A search box contains 'h2020', and a map of Europe is visible on the left. The search results show '21 datasets found', with the first result being 'CORDIS - EU research projects under Horizon 2020 (2014-2020)'. This result includes a description, download options (CSV, Excel XL, ZIP, HTML), and a 'Created' field. A 'Settings' sidebar on the left shows the operator set to 'AND'. At the bottom, there are logos for ADR, Enterprise Europe Network, and the European Commission.

Shaping Europe's digital future

POLICY

Open data

In the EU, the public sector is one of the most data-intensive sectors. Thus it holds vast amounts of data, known as public sector information (PSI). 'Open' public data are PSI that can be readily and widely accessible and re-used, sometimes under non-restrictive conditions.

The EU open data market is a key building block of the overall EU data economy. According to the study supporting the [impact assessment](#) carried out to provide input to the review of the [PSI Directive](#), the total direct economic value of [PSI](#) is expected to increase from a baseline of EUR 52 billion in 2018 for the [EU28](#), to EUR 194 billion in 2030.

Open data policy is linked with [open research data policy](#) since both address publicly funded data or their data results from public funding. Therefore, in principle, the data should be openly accessible and re-useable.

Allowing public sector data to be re-used for other purposes, including commercial ones, can:

- stimulate economic growth and spur innovation: public data has significant potential for re-use in new products and services;
- help address societal challenges with the development of innovative solutions such as in healthcare or in transport;
- enhance evidence-based policymaking and increase efficiency in public administrations;
- become a critical asset for the development of new technologies, such as [artificial intelligence](#) (AI), which require the processing of vast amounts of high-quality data;
